DETAILED ACTION

1. This action is responding to amendment filed 6/9/2006. **Claims 38 - 75** are allowed. **Claims 38, 53, 69** are independent.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance:

The cited prior art of record, either alone or in combination, fails to teach the capability that encrypted transaction requests to be received from different clients having a common electronic address and served simultaneously by different informational servers at least some of the responses to include a cookie and a tag, which to be generated by the content director to identify uniquely a corresponding informational server previously selected to service transaction requests from the Client. The tag to be independent of an electronic address (i.e. IP address and a TCP port number) associated with the corresponding informational server and the flow switch to use the tag in the parsed plain text equivalent of each transaction request to select an appropriate informational server.

So as indicated by the above statements, Applicant's arguments have been considered persuasive in light of the set of claims with limitations as well as the enabling portions of the specification. The dependent claims further limit the independent claims and are considered allowable on the same basis as the independent claims as well as for the further limitations set forth.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
